Figure 11 is a perspective view of the device 100, showing the device 100 in a closed position. The device 100 is a flexible, elongated, and segmented structure, such as a catheter or a probe, with a handle 110 at one end and a distal tip 120 at the other. The device 100 is shown in a coiled configuration, with the segments 130 and 140 forming a series of loops. The device 100 is shown in a perspective view, with the handle 110 and the distal tip 120 being visible. The segments 130 and 140 are shown in a perspective view, with the segments 130 and 140 being visible. The device 100 is shown in a perspective view, with the handle 110 and the distal tip 120 being visible. The segments 130 and 140 are shown in a perspective view, with the segments 130 and 140 being visible.
